EXPERIENCE

Head of Engineering - Fulfillment, Supply Chain and Customer Care

Westwing Group SE

Nov 2023 – present Munich, Germany

- Planned, supervised, and successfully executed a seamless transition from an in-house-built warehouse management software to a SaaS solution.
- Played a major role in re-platforming the in-house-built consumer-facing eCommerce platform to a SaaS solution and connecting all internal services to it.
- Optimized customer care tools to reduce costs and increase efficiency by leveraging BPA and SaaS solutions.
- Reduced operational costs for the area by more than 50% by optimizing infrastructure and reallocating human resources without compromising output quality.
- Keywords: SaaS Migration Cost Reduction Shopify Zendesk AWS K8S Retool

Engineering Team Lead

Westwing Group SE

Oct 2021 – Nov 2023

- Led a team of four engineers on in-house supply chain and supplier management software, defining a long-term technical roadmap and architecture.
- Managed engineers, conducted performance reviews, mentored career growth, and provided technical support.
- Collaborated with product managers and business stakeholders to refine and break down requirements into actionable tasks.

Senior Software Engineer

Westwing Group SE

Feb 2020 – Oct 2021

- I worked on in-house built software in the supply chain area. I worked on infrastructural upgrades, integrating with 3rd party carriers, refactoring and rewriting parts of the business logic, and supporting codes.
- Migrated legacy software to newer platforms and tackled several performance-related issues.
- Keywords: PHP MySQL AWS RabbitMQ Redis Elasticsearch

Senior Software Engineer

Digikala

Jan 2019 – Feb 2020

- I Built sets of APIs and management panels for an internal courier mobile app which included live tracking, route suggestion, and reporting.
- Keywords: PHP MySQL Redis Python OpenCV

Software Engineer

Zeitoon Smart Algorithm

Feb 2016 – Dec 2018

- Created a time attendance device with fingerprint/NFC, led backend at ZPAY, and contributed to Zeitoon UI.
- Keywords: Python AngularJS PostgreSQL RTOS Embedded Linux

Co-founder and Engineer

Gity Pardazan Zaman

Sep 2011 – Jan 2016

- Developed medical tech solutions, including cloud storage, VoIP appointment platform, mesh keypad/display, and emergency summon device.
- Keywords: Python Asterisk PostgreSQL RTOS Embedded Linux

PROFILE

An ambitious, enthusiastic 34-year-old engineer with 15+ years of diverse experience in developing and maintaining custom software using various technologies, platforms, and databases. With strong project management skills, I lead cross-functional teams to ensure timely, on-time delivery of high-quality solutions while continuously learning new technologies and techniques.

MOST PROUD OF

Excellent collaboration

I have an excellent relationship with the product team and the engineers I manage, collaborating closely to detail and plan all ongoing and upcoming projects.

I deliver

Doing my best but not delivering is not a desirable outcome for me. At the same time, I know when to pull the plug.

To the point

When people want to make a decisive decision, they come to me.

STRENGTHS

Engineering and Product Management Persuasive Motivator & Leader Team Building

EDUCATION

M.S. in Computer Software Engineering

Azad University

2013 – 2015

Sary, Iran

B.S. in Computer Software Engineering

Azad University

2007 – 2012

Sary, Iran
